Pay and Morale Survey 2026 Nottinghamshire Police

Findings for officers in the force, compared with England and Wales

October 2026

01 About this report

Foreword

The Pay and Morale Survey is the Police Federation of England and Wales's annual survey of its members in the federated ranks (constables, sergeants, inspectors and chief inspectors). It asks officers about their pay and allowances, morale, wellbeing, workload, rest days and professional development, and is used to make the case for officers' pay and conditions.

This year, PFEW have commissioned the report to include more than it has in previous years. We want to impactfully demonstrate the impact of "the job" on officers in all aspects of their lives. For far too long, the real impact on the personal lives of officers has been overlooked. As PFEW, we want to start to shine a light on the true burden of responsibility policing has on the officers and their families as an extension of our "Copped Enough" campaign.

To do this, the 2026 report draws on more than the 2026 Pay and Morale Survey. It also uses a PF Global poll of PFEW members and ONS data to compare officers' experiences with those of the general public. Together, these sources give a wider picture of life in policing, including new evidence on officers' experiences of being a parent.

This report sets out the key findings for Nottinghamshire Police under five themes: pay, conditions and morale; confidence in policing; wellbeing and mental health; work-life balance; parenting and caring. Each finding is shown alongside the equivalent figure for England and Wales.

Data sources

- **Pay and Morale Survey 2026:** An online survey of 18,537 PFEW members in the federated ranks, conducted by the Police Federation of England and Wales between 13 July and 8 August 2026.
- **PF Global poll of PFEW members:** An online poll of 4,158 PFEW members, conducted by PF Global on behalf of the Police Federation of England and Wales between 23 June and 6 July 2026.

247 officers from Nottinghamshire Police responded to the 2026 Pay and Morale Survey. A further 74 officers from the force responded to the PF Global poll of PFEW members.

Reading the figures

Force figures are based on all officers from the force who answered each question. England and Wales figures are weighted by force size. Figures based on fewer than 20 respondents are not reported, and figures based on 20 to 49 respondents are marked with an asterisk (*), shown with the number of respondents, and should be treated with caution. Headline figures are described as above or below England and Wales only where the difference is statistically significant (95% confidence); otherwise they are described as in line with the national average.

02 Pay, conditions and morale

Views of officers in Nottinghamshire Police on pay, workload and their overall satisfaction.

01

Satisfied with their life

43%

In line with the national average (42%)

02

Do not feel fairly paid for the stresses and strains of the job

95%

In line with the national average (93%)

03

Workload too high or much too high

71%

8 points above England and Wales (63%)

Source: PFEW Pay and Morale Survey 2026 (fieldwork 13 July to 8 August 2026). Base: all respondents from the force answering each question (Nottinghamshire Police n=228–245; England and Wales n=17,028–18,509).

Key findings

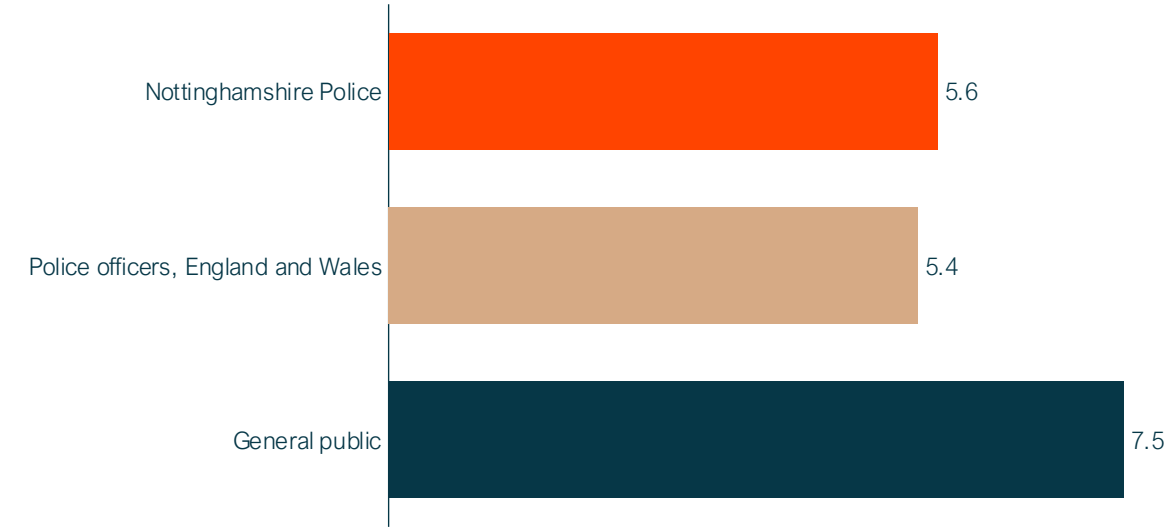

- 43% of respondents are **satisfied with their life** nowadays (scoring 7 or more out of 10) (England and Wales: 42%; see Figure 7).
- 22% of respondents are **satisfied with their job** nowadays (scoring 7 or more out of 10) (England and Wales: 25%).
- 24% of respondents **intend to resign** from the police service either within the next two years or as soon as they can (England and Wales: 21%; see Figure 8).
- 73% of respondents are dissatisfied or very dissatisfied with their **overall remuneration** (pay and allowances) (England and Wales: 77%).
- 20% of respondents struggle at times or frequently **cannot meet their household's financial needs** (England and Wales: 30%; see Figure 9).
- 53% of respondents have had **at least one rest day cancelled** in the last 12 months (England and Wales: 58%).
- 82% of respondents have had a **Performance and Development Review** (PDR) in the last 12 months (England and Wales: 91%; see Figure 10).
- 9% of respondents have **applied for promotion** to the next rank in the last year (England and Wales: 13%).

04 Wellbeing and mental health

Stress, mental health and safety on duty among officers in Nottinghamshire Police.

01

Find their job very or extremely stressful

50%

7 points above England and Wales (43%)

02

Experienced stress, low mood or anxiety in the last 12 months

82%

In line with the national average (78%)

03

Too fatigued to carry out duties

71%

In line with the national average (66%)

Source: PFEW Pay and Morale Survey 2026 (fieldwork 13 July to 8 August 2026). Base: all respondents from the force answering each question (Nottinghamshire Police n=240–241; England and Wales n=18,019–18,033).

Key findings

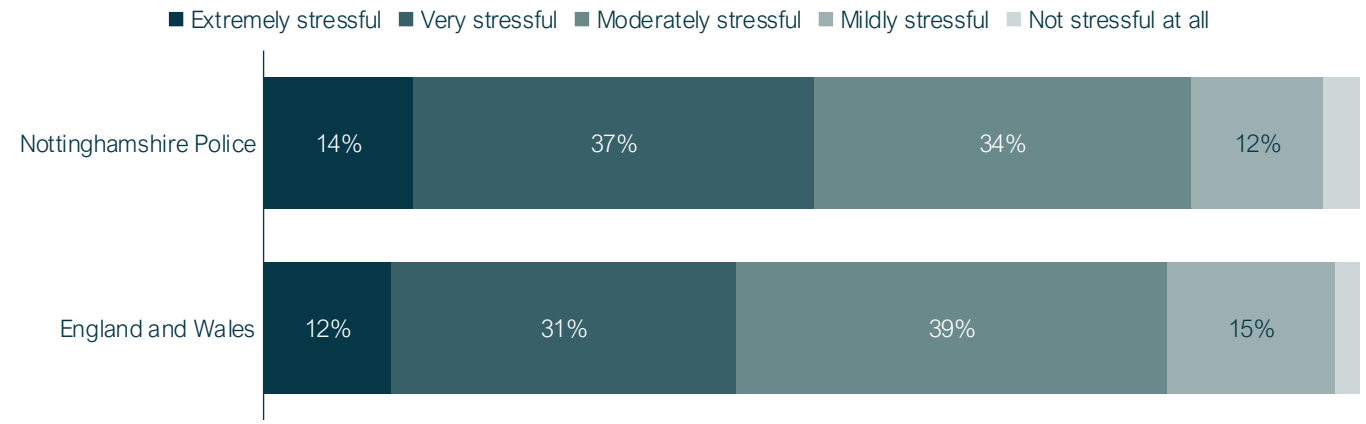

- 50% of respondents find their job **very or extremely stressful** (England and Wales: 43%; see Figure 11).
- 37% of respondents have **used their leave entitlement to take time off because of their mental health** in the last 12 months (England and Wales: 40%).
- 53% of respondents have **sought help for stress, low mood, anxiety or other mental health difficulties** (England and Wales: 49%).
- 68% of respondents **rate their force's support for officers and their wellbeing as inadequate** or requiring improvement (England and Wales: 72%).
- 54% of respondents have **felt unsafe on duty because of staffing levels** in the last three months (England and Wales: 55%).
- 49% of respondents have been **physically attacked by a member of the public** in the last 12 months (England and Wales: 44%).
- 86% of respondents **do not have access to double crewing** at all times while on duty (excluding those for whom it is not applicable) (England and Wales: 75%).
- 12% of respondents have **suffered one or more injuries requiring medical attention** as a result of work-related violence in the last year (England and Wales: 13%).

05 Work-life balance

How the job affects the lives of officers in Nottinghamshire Police outside work.

01

Often or always pressured to work long hours

35%

In line with the national average (31%)

02

Had annual leave refused

79%

17 points above England and Wales (62%)

03

Had their roster changed

62%

9 points below England and Wales (71%)

Source: PFEW Pay and Morale Survey 2026 (fieldwork 13 July to 8 August 2026). Base: all respondents from the force answering each question (Nottinghamshire Police n=211–233; England and Wales n=15,634–17,508).

Key findings

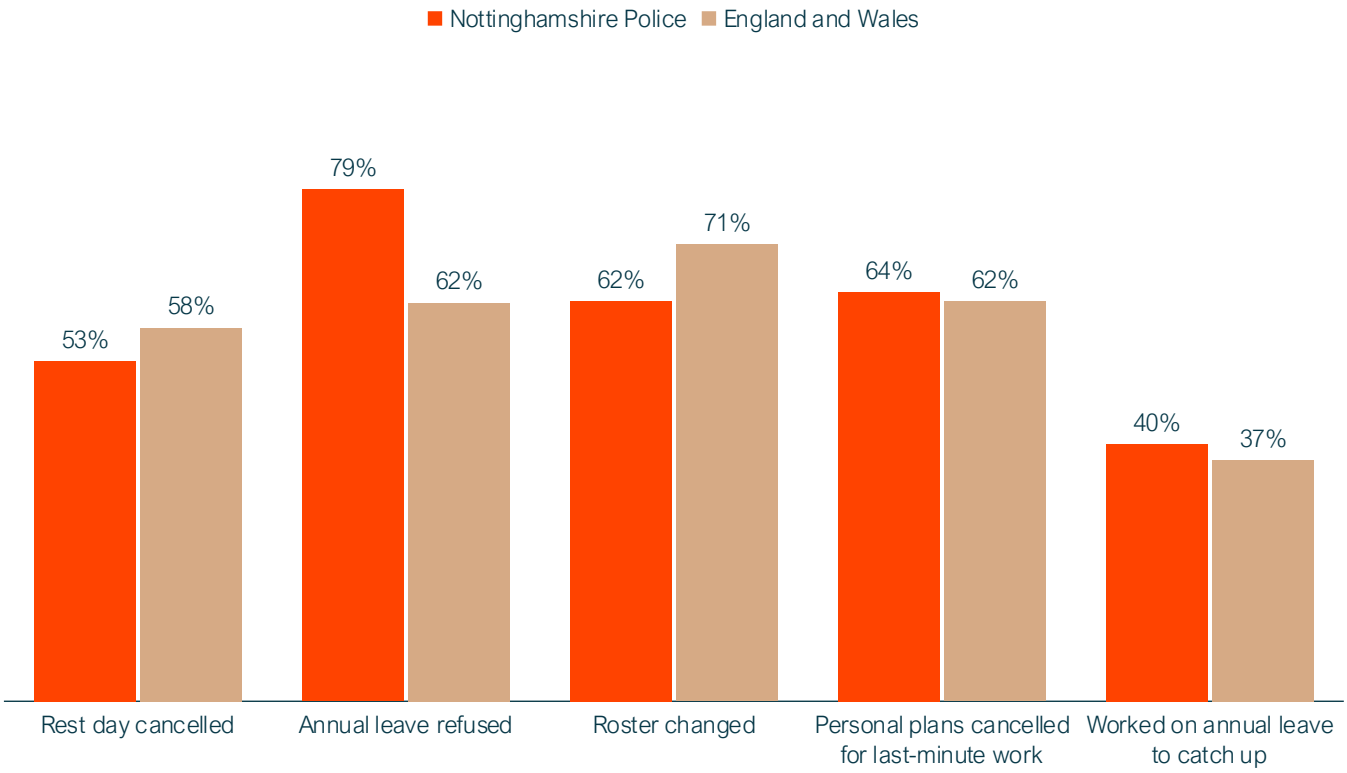

- 80% of respondents agree they have been so **fatigued it has interfered with their family or social life** in the last month (England and Wales: 76%).
- 64% of respondents have had to **cancel personal plans due to last-minute work requirements** in the last 12 months (England and Wales: 62%).
- 34% of respondents **often or always take work home** that cannot be completed in normal working hours (England and Wales: 30%).
- 40% of respondents have **worked during annual leave to catch up** with work at least sometimes (England and Wales: 37%).
- 7% of respondents find their **life outside of work very or extremely stressful** (England and Wales: 10%).
- 18% of respondents have a **flexible working arrangement** in place (England and Wales: 18%).
- 85% of respondents who work overtime do some **unpaid overtime** in an average four-week period (England and Wales: 81%).
- 13% of respondents who work night shifts have worked **more than four consecutive night shifts** in the last 12 months (England and Wales: 32%).
- 16% of respondents have had at least one **free day cancelled** in the last 12 months (England and Wales: 26%).
- 12% of respondents have had their **roster changed more than 10 times** in the last 12 months (England and Wales: 17%).

06 Parenting and caring

How parenting and caring responsibilities affect officers in Nottinghamshire Police.

01

Are parents

60%

In line with the national average (63%)

02

Parents whose fatigue has interfered with family life

79%

In line with the national average (74%)

03

Parents who have changed role or team to meet their obligations as a parent

55%

In line with the national average (55%)

Source: PFEW Pay and Morale Survey 2026 (fieldwork 13 July to 8 August 2026). Base: are parents, all respondents from the force answering (Nottinghamshire Police n=247; England and Wales n=18,518); other figures, parents from the force answering each question (Nottinghamshire Police n=108–144; England and Wales n=8,755–11,316).

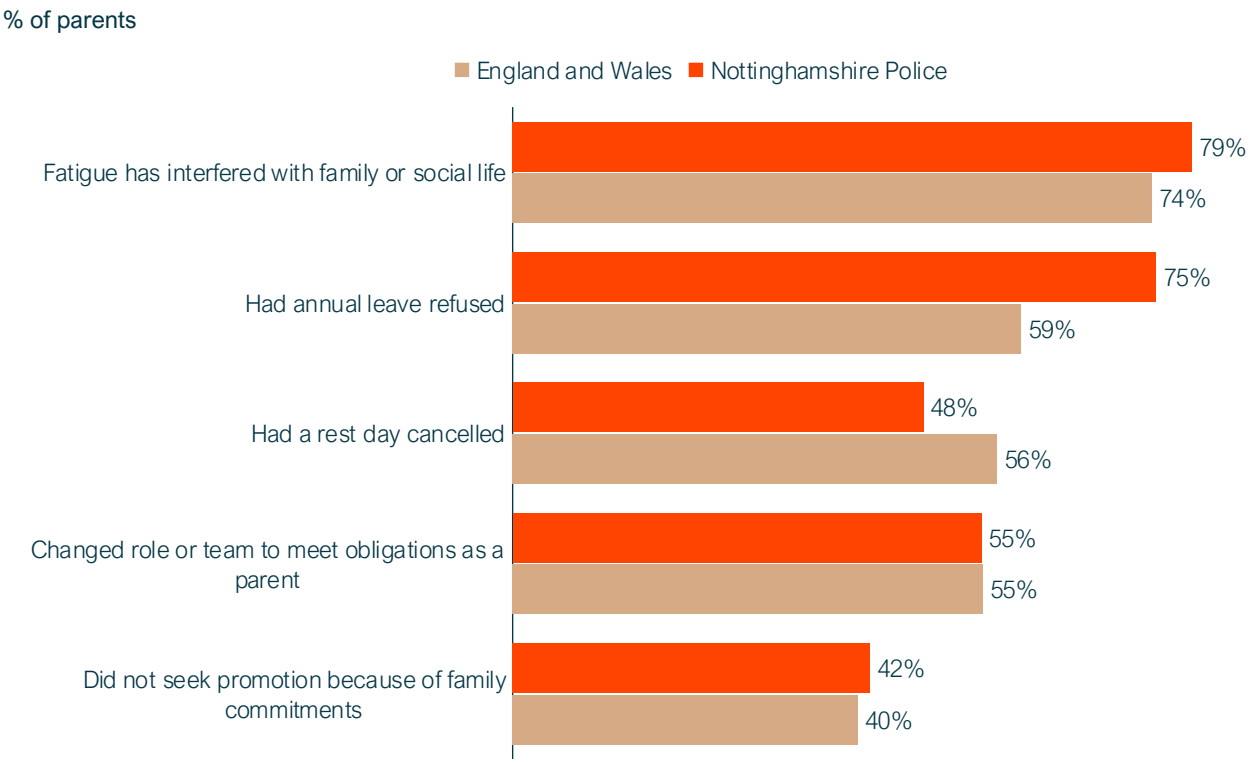

Key findings

- 69%* of **mothers** have had to change job roles or teams to meet their obligations as a parent (England and Wales: 71%; small sample: Nottinghamshire Police n=29).
- 49% of **fathers** have had to change job roles or teams to meet their obligations as a parent (England and Wales: 49%).
- 42% of parents who did not apply for promotion in the last year say they have **too many commitments in their family or personal life** (England and Wales: 40%).
- 75% of parents have had a **request for annual leave refused** in the last 12 months (England and Wales: 59%).
- 48% of parents have had **at least one rest day cancelled** in the last 12 months (England and Wales: 56%).
- 26% of parents have a **flexible working arrangement** in place (England and Wales: 25%).
- 37% of parents who use childcare rely mainly on **formal childcare settings** such as nurseries or school clubs (England and Wales: 30%).
- 12% of respondents are **carers for someone with a long-term care need** (England and Wales: 13%).
- 40%* of carers have **needed to take leave to provide or arrange care** in the last 12 months (England and Wales: 64%; small sample: Nottinghamshire Police n=30).
- 33%* of carers say the demands of caring have led to them **developing a physical or mental health condition** (England and Wales: 36%; small sample: Nottinghamshire Police n=30).
